

COURSE 1

CARELINK for People with Dementia (PwD)

1. Introduction

Introduction

- This module initially gives an introduction about the main topics of this course including, definition of dementia and its prevalence, diagnosis, symptoms, needed actions to take, and supportive environment.
- Afterwards, wandering as a common behavior of Alzheimer's disease and dementias is introduced.
- Reasons, recognizing wandering situations, out comes, and the ways to cope with wandering are then explained.
- They are followed by some descriptions about CARELINK project and its mission, goals, supportive systems and solutions as well.
- The module is ended by concluding points.

Introduction

- The course attempts to provide the basic and general information about dementia and wandering for suffered people and care givers.

- It also delivers some practical solutions in order to improve both wandering outcomes, and the quality of life for PwDs.
